COMA JOINT EXAM 2014

Kenya Certificate of Secondary Education BIOLOGY PAPER 1 (THEORY) **TIME: 2 HOURS**

INSTRUCTIONS TO CANDIDATES:

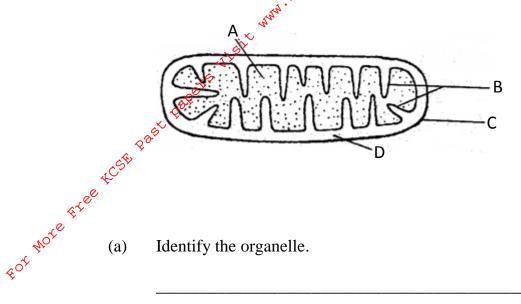

- 1. Write your **Name**, **Index Number** and **School** in the spaces provided above.
- 2. **Sign** and write the **date** of examination in the spaces provided above.
- 3. Answer **all** the questions in the spaces provided.
- 4. Answers must be written in the spaces provided in the question paper.
- 5. Additional pages must not be inserted.
- 6. Check the question paper to ascertain that all the pages are printed and that no questions are missing.

FOR EXAMINER'S USE ONLY:

Question	Maximum	Candidate's
	Score	Score
1 - 26	80	

Biology Paper 1 **Turnover**

The diagram **below** represents a cell organelle. 2.

Identify the organelle.

(1 mark)

Name the part labelled **B**. (b)

(1 mark)

State the function of part labelled **A**. (c)

(1 mark)

State the functions of the following parts of a light microscope. 3.

Condenser. (a)

(1mark)

Diaphragm. (b)

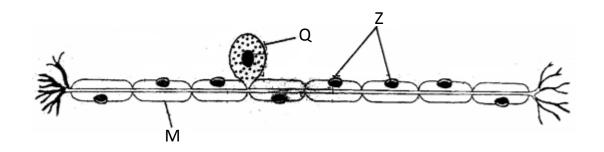

(1 mark)

4.	(a)	Explain three ways in which a red blood cell is adapted to its function.	(3 marks)
		Explain three ways in which a regionout cen is adapted to its function.	
		Lee V	
		4.2ee	
		- This is a second of the seco	
	(b)	In which form is carbon (IV) oxide transported. the functions of the following organelles. Centriole.	(1 mark)

	105%	oscope s near of view.	
E FF OR		rm one student trying to estimate the size of onion cells observed the following obscope's field of view.	
		(a) Define the term resolving newer	(1 morts)
		(a) Define the term resolving power.	(1 mark)
	(b)	If the student counted 20 cells across the field of view calculate the size of micrometers.	one cell in (2 marks)
13.	(a)	Distinguish between transpiration and guttation.	(2 marks)

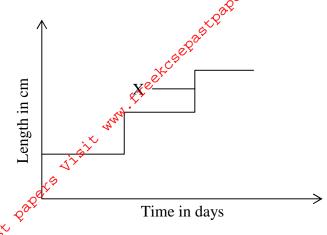

(b)	State two importance of guttation in hydrolytes.	(2 marks)
	£teekcsege*	

14. The diagram **below** shows the exchange of gases in alveolus.

- (a) State how the alveoli are adapted to their function. (3 marks)
- (b) Name the cell labelled \mathbf{A} . (1 mark)
- 15. (a) Distinguish between respiratory quotient and oxygen debt. (2 marks)
 - (b) Name the site where anaerobic respiration occurs in the cell. (1 mark)

16. Study the graph **below** and answer the questions that follow.

(a) Qo What is the name given to the type of graph?

(1 mark)

(b) What is the name used to describe point \mathbf{X} .

(1 mark)

(c) State the importance of part **X**.

(1 mark)

(d) Name the phylum in which the graph represented in above occurs.

(1 mark)

17. (a) Define the term natural selection.

(1 mark)

(b) Name **three** evidence of organic evolution.

(3 marks)

State **one** adaptation of the following parts of mammalian eye. 18. Fovea centralis. (i) (1 mark) Sclera. (ii) (1 mark) For More Free Kcst Past Cilliary body. (1 mark) 19. Name the cartilage found between vertebrae of the vertebral column. (1 mark) Differentiate between gaseous exchange and ventilation. 20. (2 marks) (a) Name the respiratory sites of the following: (b) (i) (1 mark) Fish (ii) (1 mark) **Insects**

21.	(a)	Name	e two cardiovascular diseases:	(2 marks)
			free tree to the tree tree to the tree tree tree tree tree tree tree	
			X c ^{oo}
