## TIME: $21 / 2$ HOURS

## MUMIAS DISTRICT JOINT EVALUATION EXAM <br> Kenya Certificate of Secondary Education (K.C.S.E.)

## Physics

Practical

## INSTRUCTIONS TO CANDIDATES:

- Write your name and index number in the spaces provided above.
- Sign and write the date of the examination in the spaces provided above.
- You are supposed to spend the first 15 minutes of the $21 / 2$ hours allowed for this paper reading the whole paper carefully.
- Marks are given for a clear record of the observation actually made, their suitability, accuracy and the use made of them.

## For Examiner's Use Only

## Question 1

|  | (b) | (d) | (e) | (f) | (g) (i) | (ii) | Total |
| :--- | :---: | :--- | :--- | :--- | :--- | :--- | :--- |
| Marks Score | 1 | 8 | 5 | 3 | 1 | 2 | 20 |
| Candidate's score |  |  |  |  |  |  |  |

## Question 2

| Section | A |  |  |  | B |  |  |  |  |
| :--- | :---: | :---: | :---: | :--- | :--- | :--- | :--- | :--- | :--- |
|  | (a) | (b) | (c) | (e) | (d) | (e) | (f) | (g) | Total |
| Marks Score | 1 | $2^{1 / 2}$ | 1 | $2^{11 / 2}$ | 6 | 5 | 1 | 1 | 20 |
| Candidate's score |  |  |  |  |  |  |  |  |  |

[^0]1. You are provided with the following apparatus:

- Pendulum bob.
- Thread about ( 1.5 m )
- Stop watch
- Retort stand boss and clamp
- Vernier callipers
- Beam balance
- Metre rule
- Two pieces of wood.
(a) Measure the diameter of the pendulum bob.
$d=$ $\qquad$ m.
(b) Determine mass of the pendulum bob using beams balance.
$\mathrm{m}=$ $\qquad$ kg .
(c) Set up the apparatus as shown in the figure below.

(d) Tie the pendulum bob to the thread provided. Measure the length of the thread to $\mathrm{X}=1.0 \mathrm{~m}$ and fix it as shown above. The pieces of wood should help hold thread firmly.
(e) Displace the pendulum bob through a small angle. Determine the time taken for it make 20 complete oscillations. Repeat the procedure for other values of x as shown in the table and record the corresponding time.

| Length X (m) | Time for 20 <br> oscillations (s) | Period T (s) | $\mathbf{T}^{2} \mathbf{S}^{\mathbf{2}}$ ) |
| :--- | :--- | :--- | :--- |
| 0.30 |  |  |  |
| 0.40 |  |  |  |
| 0.50 |  |  |  |
| 0.60 |  |  |  |
| 0.70 |  |  |  |
| 0.80 |  |  |  |
| 0.90 |  |  |  |

(f) (i) Plot the graph of $\mathrm{T}_{\partial}^{2}(\mathrm{y}$-axis) against x

(ii) Calculate the slope, $\mathbf{s}$ of the graph.
(iii) The graph of the equation is given by the equation:

$$
\mathrm{T}^{2}=\frac{4 \pi^{2} \mathrm{x}}{\mathrm{P}}
$$

Calculate the value of P .
(iv) The weight of the pendulum bob is given by the equation, $\mathrm{w}=\mathrm{mP}$, calculate the weight, $\mathbf{w}$ of the bob.
2. (a) You are provided with the following apparatus:

- Resistance wire fitted on a scale labeled MN
- Switch
- Voltmeter
- Ammeter
- Two dry cells
- Six connecting wires
(i) Set -up the apparatus as shown in the figure below;

(ii) Remove the crocodile clip from the resistance wire MN and close the switch. Record the voltmeter reading.
$\mathrm{Y}=$ $\qquad$ .V
(iii) Attach the crocodile clip to the resistance wire such that $l=10 \mathrm{~cm}$
(iv) Record the voltmeter and ammeter readings in the table below.
(v) Repeat the procedure in (iii) and (iv) for $l=20 \mathrm{~cm}, 30 \mathrm{~cm} 50 \mathrm{~cm}$ and 80 cm
(vi) Complete the table beotow:

(viii) (a) Plot a graph of $\left(\frac{\mathrm{V}}{\mathrm{Y}-\mathrm{V}}\right)$ (vertical axis) against R .
(5mks)

(b) Determine the slope, $m$ of the graph.
(c) The graph is given by the equation

$$
\frac{\mathrm{V}}{\mathrm{Y}-\mathrm{V}}=\frac{\mathrm{MR}}{5}+\mathrm{d}
$$

Determine the value of m and d .

[^0]:    This paper consists of 6 printed pages. Candidates should check to ascertain that all pages are printed as indicated and that no questions are missing.
