PRACTICAI $e^{2 e^{5}}$
JULY/AUGOUST 2013
TIME: $2^{\nmid}{ }^{\Upsilon} / 2$ HRS

## LARI SECONDARY SCHOOLS JOINT- DISTRICT MOCK KENYA CERTIFICATE OF SECONDARY EDUCATION PHYSICS PAPER 3 (PRACTICAL)

## INSTRUCTION TO CANDIDATES

- Write your name and index number in the spaces provided above.
- Answer ALL the questions in the spaces provided.
- You are supposed to spend the first 15 Minutes of $21 / 2 \mathrm{hrs}$ allowed for this paper reading the whole paper carefully before commencing your work.
- Marks are given for clear record of the observation actually made, their suitability, accuracy and the use made of them.
- Candidates are advised to record their observation as soon as they are made.
- Non-programmable silent electronic calculator and knec mathematical tables may be used except where stated otherwise.

## FOR EXAMINER'S USE ONLY

## Question 1.

| MAXIMUM SCORE | b | d | e | f |
| :--- | :--- | :--- | :--- | :--- |
| CANDIDATE'S SCORE | 9 | 6 | 3 | 2 |

## Question 2.

| MAXIMUM SCORE | a | b | C(i- <br> ii) | C(iii-iv) |
| :--- | :--- | :--- | :--- | :--- |
| CANDIDATE'S SCORE | 1 | 5 | 7 | 7 |

TOTAL $\square$

OVER ALL TOTAL

1. You are provided with following:A thermometer $\left(-10^{\circ} \mathrm{c}\right.$ to $\left.110^{\circ} \mathrm{c}\right)$ 1 retort stand
A clamp and a boss Cotton wool
A rubber band
Access to hot water $80^{\circ} \mathrm{c}$ to $100^{\circ} \mathrm{c}$
A 100 ml beaker
A stop watch

PART 1
a) Clamp the thermometer vertically. Fill the beaker with the hot water. Lower the thermometer into the hot water as shown in the figure below.

Measurer the temperature, , of the water and record in the table below at time $t=0$
b) Raise the thermometer from $\&$ he water and move it away from the beaker. Start the stopwatch. Measure and record the temperature of the thermometer bulb after 30 s and continue recording thestemperature 30 s intervals for about 4 minutes. Enter your results in the table below. $\qquad$

## (9marks)

| Time, t (s) | Temperature, ( ${ }^{\mathbf{0} \mathbf{c})}$ |  |
| :---: | :---: | :---: |
|  | Part 1 | Part 2 |
| 0 |  |  |
| 30 |  |  |
| 60 |  |  |
| 90 |  |  |
| 120 |  |  |
| 150 |  |  |
| 180 |  |  |
| 210 |  |  |
| 240 |  |  |

Empty the beaker
PART 2
c) Wrap the bulb of the thermometerwith cotton wool and tie the cotton wool with the rubber band. Repeat part (a) of the expériment by placing the thermometer in the beaker of hot water. Start the stopwatch whien the temperature, , of the hot water is the same as in part (a).
d) On the grid providex, plot a graph of (Y-axis) against time for the thermometer readings of part (a). Label the graph as $\mathrm{G}_{1}$.
e) On the same axis above plot a graph of against time for the thermometer readings of part 2 . label the griath as $\mathrm{G}_{2}$
(3 marko)

f) By analyzing the graphs, state and explain in which thermometer the rate of cooling is faster. (3 marks)
2. You are provided with the following apparatus.

- Meter rule
- Knife edge
-One 100g mass
-One 50 g mass
-Two 20g masses
- One 10 g mass

Two strings (about 30 cm each)

## PROCEDURE

(a) Set the meter rule in equilibrium. Record the point of balance X of the meter rule (when no mass is attached)
$X=$ $\qquad$ cm (1 mark)
(i) Arrange the apparatus as shown below.
(ii) Place the 100 g mass, $\mathrm{M}_{1}$ at the 20 cm of the meter rule with the aid of the thread .The knife edge is placed at the 40 cm mark of the meter rule.
(iii)Balance the meter rule by using the mass $\mathrm{m}_{2}=50 \mathrm{~g}$. Record the distance d , in cm for the 100 g mass $\mathrm{M}_{1}$.
(b) Repeat the procedure (iii) and (iv) for different masses as shown in the table below.

| Mass $\mathrm{M}_{1}(\mathrm{~g})$ | 100 | 120 | 150 | 170 | 140 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Distance $\mathrm{d}(\mathrm{cm})$ |  |  |  |  |  |

Complete the table.
(c) (i) On the grid provided, plot the graph of $\mathrm{M}_{1}$ (vertical axis )against d.(5marks)

(ii) Determine the gradient of the graph. (2 marks)
$\qquad$
$\qquad$
$\qquad$
$\qquad$
(iii) Given that the equation of the graph is given as;

$$
\mathrm{M}_{1}=\frac{m 2 d}{k}+\frac{m(x-40)}{k}
$$
