Paper 3
MAY/JUNE 2014
Time: $21 / 2$ Hours

## CROSS COUNTRY EXAM 2014 <br> Kenya Certificate of Secondary Education <br> 232/3 <br> PHYSICS PRACTICAL <br> Paper 3 <br> MAY/JUNE 2014 <br> Time: $\mathbf{2 ~}_{1 / 2}$ Hours

## INSTRUCTIONS TO THE CANDIDATES:

Write your name and index number in the spaces provided above.
Answer all questions in the spaces provided in the question paper.
You are supposed to spend the first 15 minutes of the $21 / 2$ hours allowed for this paper reading the whole paper carefully.
Marks are given for a clear record of the observation actually made, their suitability, accuracy and the use made of them.
Candidates are advised to record their observations as soon as they are made.
Mathematical tables, slide rules and calculators may be used.
Record your observations as soon as you make them.
For Examiners' Use Only

| Question 1 | a | c | d | e | f | g |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Max. score | 1 | 7 | 5 | 3 | 2 | 2 |
| Candidate's score |  |  |  |  |  |  |
| Total |  |  |  |  |  |  |

| Question 2 | a | b(iv) | b(ii) | b(iii) | b(iv) |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Max. score | 4 | 7 | 5 | 2 | 2 |
| Candidate's score |  |  |  |  |  |
| Total |  |  |  |  |  |

[^0] missing.

1. You are provided with:

- A resistance wire mounted on millimétér scale
- Two dry cells in a cell holder
- A voltmeter
- Four connecting wires with a crocodile clip at one end

## Proceed as follows:- $\omega^{*}{ }^{x}$

(a) Set up the circuit as in the figure below and determine the total electromotive force E , of the cells.

Electromotive force E, of the cells.
(b) Set up the circuit shown in the figure below, connect the wire with clip on the mounted wire at a length (L) of 10 cm from the end marked A. Record the voltmeter reading in the table provided in part (c) below:

(c) Repeat the procedure in (b) above for the following values of length $\mathrm{L}: 20 \mathrm{~cm}, 30 \mathrm{~cm}, 40 \mathrm{~cm}$, 50 cm , and 60 cm and complete the table below:

| $\mathrm{L}(\mathrm{cm})$ | V(volts) | E-V(volts) | $\frac{\mathrm{V}}{\mathrm{E}-\mathrm{V}}$ |
| :---: | :--- | :--- | :--- |
| 10 |  |  |  |
| 20 |  |  |  |
| 30 |  |  |  |
| 40 |  |  |  |
| 50 |  |  |  |
| 60 |  |  |  |

(d) Plot a graph of $\frac{\mathrm{V}}{\mathrm{E}-\mathrm{V}}$ against $\mathrm{L}(\mathrm{cm})$
(e) Determine the slope of the graph.
(f) Given the equation $\frac{V}{\mathrm{E}-\mathrm{V}}=\mathrm{K}_{1} \mathrm{~L}_{1}+\mathrm{K}_{2}$

Determine the values of $\mathrm{K}_{1}$ and $\mathrm{K}_{2}$
$\mathrm{K}_{1}$
$\mathrm{K}_{2}$
(g) Given that $4 \mathrm{~K}_{2} \mathrm{r}=10$ where r is the internal resistance of the cells. Determine the value of $r$.
2. You are provided with the following apparatifs:

- A candle
- A lens holder
- A convex lens
- A screen
- A metre rule
- An objects

## Proceed as foflows:

Using an ${ }_{5}$ bject infinity outside the room, focus its image on the screen provided. The image should be ass,sharp as possible and inverted. Measure the distance from the lens to the screen hcm. Repeat the same for three other values of $h$. Record your results and then calculate the average value of the three results, Hcm.

First reading of $h$.
Second reading of $h$
Third reading of $h$
The average value of $h(H)$

Arrange the candle flame, the lens, and the screen as shown in the diagram below:

b) i) For particular value of $u$, adjust the position of the screen until a sharp image appears on the screen. Measure distance Vcm. Repeat the experiment for each of the other values of $u$, and enter the results in the table below:
(7mks)

| Distance L(cm) | Distance V(cm) | $\mathbf{u v}\left(\mathbf{c m}^{2}\right)$ | $\mathbf{U}+\mathbf{v}(\mathbf{c m})$ |
| :--- | :--- | :--- | :--- |
| 12 |  |  |  |
| 15 |  |  |  |
| 18 |  |  |  |
| 21 |  |  |  |
| 24 |  |  |  |
| 27 |  |  |  |
| 30 |  |  |  |

(ii) Plot a graph of $u v$ against $u+v$
(5mks)

(iii) From your graph, calculate the slope S
(ine) ${ }^{5}$ Calculate the value of k given that $\mathrm{kH}=\mathrm{S}$
(2mks)

[^0]:    This paper consists of 6 printed pages. Candidates should check to ascertain that all pages are printed as indicated and that no questions are
