## EKSIKA JOINT EVALUATION TEST.

## Kenya Certificate of Secondary Education (K.C.S.E)

## 121/1

MATHEMATICS
PAPER 1
MAY/JUNE 2014
TIME: 2 HOURS

## INSTRUCTIONS TO CANDIDATES.

1) Write your name and index number in the spaces provided above.
2) Sign and write the date of examination in the spaces provided above.
3) This paper consisits of two section I and II.
4) Answer ALL questions in section I and only five questions from section II.
5) Show all the steps in your calculations.

FOR EXAMINERS' USE ONLY.

SECTION I

| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | TOTAL |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

SECTION II

| 17 | 18 | 19 | 20 | 21 | 22 | 23 | 24 | TOTAL |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |  |  |

Grand Total

This paper consists of 16 printed pages.
Candidates should check the question paper to ascertain that all pages are printed as indicated and no questions are missing.

## SECTLON I (50MARKS)

1 Without using tables or calcufators, evaluate.

2 Without using a calculator or tables, find the value of $y$ given that $y=(a+b)(x-c)^{2}$ and $\mathrm{a}=5, \mathrm{~b}=6, \mathrm{x}=-3$ and $\mathrm{c}=2$.
(3mks)

Solve the following inequalities and represent the solution on a single number line.

$$
\begin{align*}
& 3-2 x<5 \\
& 4-3 x \geq-8 . \tag{3mks}
\end{align*}
$$

4 Use the reciprocal, squareând square-root tables to evaluate to 4 significant figures the expression.

$$
\begin{equation*}
\sqrt{\frac{1}{24.56}+\frac{1}{s i n} .346^{2}} \tag{4mks}
\end{equation*}
$$

A Kenyan bank buys and sells foreign currencies at the exchange rates shown below.

| BUYING (KSHS) | SELLING (KSHS) |
| :---: | :---: |
| 147.56 | 148.00 |
| 74.22 | 74.50 |

1U.S Dollar 74.22 74.50

An American arrived in Kenya with 20,000 Euros. He converted all the Euros into Kenyan Shillings at the bank. He spent Kshs.2,510,200 while in Kenya and converted the remaining Kenya shillings into U.S Dollars at the bank. Find the amount in dollars that he received.
e
Translation $Q$ is represented by the column vector $\binom{6}{3}$ and another translation $R$ by the column vector $\binom{-4}{2}$. A point $S$ is mapped onto a point $T$ by $Q$ and a point $T$ is mapped into a point U by R. If point U is $(8,-4)$, determine the coordinates of point S.

8 Find the equation of the perpendicular line that passes through the mid - point $X$ of $C(-7,8)$ and $D(3,-8)$ (4mks)

9 Mbom paid Kshs. 160 for a blairse after getting a discount of $20 \%$. The vendor made a profit of $30 \%$ on the sale of this blouse. What percentage profit would the vendor have made if no discoúnt was allowed?

10 The base of a triangle is 3 cm longer than its height. Given that the area of the triangle is $35 \mathrm{~cm}^{2}$, determine the height of the triangle.

11 Solve for X in the equation.

$$
\frac{6 x-4}{3}-\frac{2 x-1}{2}=\frac{6-5 x}{6}
$$

The figure below shows a circfe centre O . Chord AB subtends $30^{\circ}$ at the centre. If the area of the minor segmentels $5.25 \mathrm{~cm}^{2}$, find the radius of the circle.

13 A certain two - digit number is equivalent to five times the sum of the digits. It is found to be 9 less than the number formed when the digits are interchanged. Find the number.

14 The surface area of two similates are $12 \mathrm{~cm}^{2}$ and $108 \mathrm{~cm}^{2}$ respectively. If larger one has a volume of $810 \mathrm{~cm}^{-3}$. Find the volume of the smaller one. (3mks)

15 The exterior angle of a regular polygon is equal to one - third of the interior angle. Calculate the number of sides of the polygon and give its name.
(3mks)

16 King'oo spends one-third of his salary on food, one - quarter on rent, three - fifth of the remainder on transport and saves the rest.If he spends Kshs. 1800 on transport, find how much money he saves.

# SECTION II (50MARKS) 

Choose ${ }^{2}$ any five questions only
17 John bought 3 brands of dear A , B and C.The cost price of the brands were sh. 25 ,sh. 30 and sh. 45 per kilogram respectively. He mixed the brands in the ratio of 5:2:1 respectively. After selling the mixture, he made a profit of $20 \%$.
a) Howismuch profit did he make per kilogram of the mixture.
b) After one year, the cost price of each brand was increased by $12 \%$.
i) For how much did he sell one kilogram of the mixture to make $20 \%$ profit.
(3mks)
ii) What would have been his percentage profit if he sold one kilogram of the mixture at shs. 40.25 ?

The diagram below represents a solid eornsisting of a hemispherical bottom and a conical frustrum at the top. $\mathrm{O}_{1} \mathrm{O}_{2} \pm 4 \mathrm{~cm}, \mathrm{O}_{2} \mathrm{~B}=\mathrm{R}=4.9 \mathrm{~cm}$

$$
\mathrm{O}_{\mathrm{S}}^{\mathrm{a}} \mathrm{~A}=\mathrm{r}=2.1 \mathrm{~cm}
$$

a) Determine the height of the chopped off cone and hence the height of the bigger cone.
b) Calculate the surface area of the solid.
c) Calculate the volume of the solid.

19 a) The bill for completely covering the floor of a rectangular room with carpet costing shs. 70 per square metre is shs.1960.If one side of the room is X m long; show that the lefigth of the other side is $\frac{28}{x} m$
$\mathrm{b}_{2}$ By leaving a uniform width of $1 / 2 \mathrm{~m}$ uncovered all round, shs. 700 could have been saved. Use this information to form an equation in x and show that it reduces to $\mathrm{X}^{2}-11 \mathrm{x}+28=0$.
(4mks)
c) Solve the equation and hence find the dimensions of the room. (3mks)

20 The angle of elevation of the top of flagpole from a point A on a level ground is $13^{0}$. The angle of elevation of the top of the flagpole from another point B nearer the pole and 12 m from A is $3 \theta^{9}$. Find;
a) i) The height of the flagpole
ii) The distance from point B to the top of the flagpole.
b) $\quad \operatorname{Tan} 105^{\circ}=-2-\sqrt{3}$. Determine the value of Tan $15^{0}$ in surd form. ( 3 mks )

b) From your graph determine i he roots of the function. $2 \mathrm{x}^{2}-7 \mathrm{x}-2=0 .(1 \mathrm{mk})$
c) By drawing a suitable graph of function $y=2 x-7$ on the same axis, solve the 8imultaneous equations $y=2 x^{2}-7 x-2$ and $y=2 x-7$. (4mks)

22 Three people; A , B and C work together to make a certain number of tins. If person C was to work alone he will take $4 / 9$ hours to complete the job. If all working together they will take 1 hr 40 min to complete the job. They all started working together however person B left after first 40min,while person C left 20min later. Person A took a further 1 hr 46 min . Calculate how long it would take if all the tins were made by;
a) Person A alone?
(6mks)
b) Person B alone?
c) Person A and C alone?

23 In the figure below O , is the centreiof the circle. $\angle \mathrm{AEB}=50^{\circ}, \angle \mathrm{EBC}=80^{\circ}$ and $\angle \mathrm{ECD}=30^{\circ}$.

Giving reasons, calculate
i) $\angle C D E$
(2mks)
ii) $\angle D F E$
(2mks)
iii) Obtuse angle COE
(2mks)
iv) $\angle A D E$
(2mks)
v) $\angle C A E$

24 Patients who attended clinic in one week grouped by age as shown in the table below.

| X | So. of patients |
| :---: | :---: |
|  |  |
| 0-5 | 14 |
| 5-15 ${ }^{\text {a }}$ | 41 |
| 15-25 | 59 |
| 25-45 $5^{2}$ | 70 |
| 45-75 | 15 |

a) $e^{-\frac{0}{e}}$ Estimate the mean age.
(4mks)
b) On the graph provided, draw actisistogram to represent the distribution.
