MATHEMATICS

## Paper 1

January/February
2½ Hours

## INSTRUCTIONS TO CANDIDATES

(a) Write your name and Admission number in the spaces providedabove
(b) Write the date of examination in the spaces provided above
(c) This paper consists of TWO sections. Section I and Section HI $^{\text {(d }}$
(d) Answer ALL the questions in section I and only five questions from Section II
(e) All answers and working must be written on the gevestion paper in the spaces provided below each question
(f) Show all the steps in your calculations, giving your answers at each stage in the spaces below each question
(g) Marks may be given for correct wofking even if the answer is wrong
(h) Non-programmable silent calculdtors and KNEC mathematical tables may be used except where stated otherwise.
(i) This paper consists 16 pribeted papers
(j) Candidates should check the question paper to ascertain that all the papers are printed as indicated and that no questions are missing.

## FOR EXAMINERS ONLY

## SECTION 1

## SECTION 1 (50 MARKS)

Answer all the questions in this section

1. Evaluate
$\frac{18 \div 3 o f(-2) \times 8 \div 24}{-4 \div 6 \times 2}$
(3mks)
2. Solve for $x$ in the equation
$27^{x-1} \times 2^{y}=432$

3. Given that $\mathbf{O A}=5 \mathrm{i}-3 \mathrm{j}$ and $\mathbf{O B}=3 \mathbf{i}$. Find the magnitude of $\mathbf{A B}$ to one decimal place ( 3 mks )

4. The distance between points $P$ and $Q$ on a section of a straight road is 12 km . Mukai and Mutual left points $P$ and $Q$ respectively at the same time and moved towards each other at $1 \mathrm{~m} / \mathrm{f}^{\mathrm{s}}$ and $1.5 \mathrm{~m} / \mathrm{s}$ respectively. Calculate
a) Their relative speed
b) The time they will take before meeting
5. Use reciprocal tables to find the reciprocal of 0.02674 , hence evaluate to $2 \mathrm{~s} . f$. ( 3 mks )

$$
\sqrt{\frac{0.4096}{0.02674}}
$$

6. The image of $P(5,5)$ under an enlargement scale factor 2 is $p^{1}(8,7)$. Find $\not \subset$ he coordinates of the centre of enlargement
7. An open rectangular box measures externally 32 cm long, 27 cm wide and 15 cm deep. If the box is made of wood 1 cm thick, what volume of wood is used?
 is $36^{\circ}$, if he walks 65 m towards the base of the tower; the angle becomes $57.5^{\circ}$. Calculate the height of the tower?
8. On the triangle PQR, draw a circle touching PR,QP produced and QR produced (3mks)

9. Find the perimeter of the figure below. Give your answer correcteofour significant figures.
(Take $\pi=\frac{22}{7}$ )

(3mks)
10. A line $L$ passes throlgh $P(8,6)$ and is perpendicular to the line $3 y+2 x+6=0$. Find the equation of lirie $L$ and write it in the form $y=m x+c$.

11. Expand and simplify the expression $\left(2 x^{2}-3 y^{3}\right)^{2}+12 x^{2} y^{3}$
12. Solve for $P$ given that, $\log _{2}(2 p+3)-2=\log _{2}(p-2)$

13. A Forex Bureau in Kenya buys and sells foreign currencies as shown below:

(a) Calculate the amount of money, in Kenya shillings, that she received
(b) While in Kenya, the businesswoman spent Ksh. 2258000 and then converted the balance to Japanese Yen. Calculate the amount of money, to the nearest Japanese Yen, that she received
14. Two similar cylinders have the ratio of the areas as 9:25. Given that they cylinder has a volume of $750 \mathrm{~cm}^{3}$, calculate the volume of the smaller cylinder? (3mks)

## SECTION II

## Answer only five questions from this section

17. a) Mr. Mulei operates two passenger service vehiges along the Nyeri-Nairobi route. One is a 16 -seater matatu and the other an 8 -seatefPeugeot 504 . Each vehicle makes one route trip per day, and the charges are ksto 250 and ksh. 300 per passenger respectively (one way). The matatu uses diesel which Cost ksh. 48 per litre and the Peugeot 504 uses regular petrol which costs ksh. 52 perlitre. The fuel consumption of the two vehicles is in the ratio 4:3 respectively.
a) If the matatu uses 80 litree for the round trip, determine the fuel consumption of the

Peugeot 504 for the rgend trip
e
b) Calculate the daily collection for each vehicle
(2mks)
c) Determine which vehicle is more profitable (on a daily basis) and by how much. (other factors being constant).
d) If the prices of both types of fuel go up by $20 \%$, determine the percentage change in the daily collection
18. Four towns $K, L, M$ and $N$ are such that $L$ is 94 km directly to the North of $K$ and $M$ is on a bearing of $295^{\circ}$ from K at a distance of 60 km . N is on a bearing of $310^{\circ}$ from M and at a distance of 42 km , using a scale 1:1000000.
a) Make an accurate scale drawing to show the relative scale positions of the towns
(4mks)

19. The co-ordinates of the vertices of a triangle PQRS are $P(0,4), Q(2,0)$ and $R(4,6)$. The vertices of its image under a rotation are $P(5,1) Q(1,-1)$ and $R(7,-3)$.
(a) (i) On the grid provided, draw $P Q R$ and its image $P^{\prime \prime} Q^{\prime} R^{\prime}$
(2mks)

|  |  |  |  |  |  |  |  |  |  |  |  |

|  |  |  |  |  |  |  | $\underline{0}$ | I | 迷 |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  | Iil |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |

(ii) By construction, determing the centre and angle of rotation
(c) $P^{\prime}$ n the same grid as (a) (i) above, draw $P^{\prime \prime} Q^{\prime \prime} R^{\prime \prime}$, the image of $P^{\prime} Q^{\prime} R^{\prime}$ under a reflection in $<O^{\prime}$ the line $y=x$
(i) Draw the line of symmetry of triangle PQR
(ii) Write down the equation of the line
20. The frequency distribution table below represents the number of kilograms of meat sold in butchery.

| Mass in kg | $1-5$ | $6-10$ | $11-15$ | $16-20$ | $21-25$ | $26-30$ | $31-35$ |
| :--- | :--- | :--- | :--- | :--- | :---: | :---: | :---: |
| Frequency | 2 | 3 | 6 | 8 | 3 | 1 | 1 |

a) State the modal frequency.

b) Calculate the mean mass to 2 decimal places

21. The figure two intersection circles with centre $A$ and $B$ and radii 7 cm and 10.5 cm respectively.

The distance between $A B-14$ and $A M: M B-3: 4$

Calculate to four significant fig the;
a) Size of angle CAD
b) Size of angle CBD.

(4mks)
22. In an $n$-sided polygon two angles are right angles and each of the remaining angles is $150^{\circ}$
a) Find the value of $n$ hence the sum of interior angles of this polygon.
(4mks)

23. In figure below, $A B$ is parallel to $C D$. The lines $A D$ and $C B$ intersect at $X . C B=C X: X B=3: 1, \angle A B X=40^{\circ}$ and $\angle C X D=80^{\circ}$

(a) Find the length of CX

(b) Determine, correct to 2 significant figures:
(i) The perpendicular distance between $A B$ and $G Q$.

(d) Calculate, correct to one decimal place, the area of triangle CXD.
(2mks)
24. The cost $C$, of producing $n$ items varies directly as $n$ and partly as the inverse of $n$. to produce two items it costs Ksh. 135 and to produce three items it costs Ksh. 140
(a) The constant of proportionality and hence write the equation connecting C and n
(b) The cost of producing 10 items;

(c) The number of items of produce at a cost of Ksh. 756.
