FORM 3
CHEMISTRY (PRACTICAL)
TIME: 1HOUR

## QUESTION

You are provided with

-Acid solution $\mathbf{Q}$ made by dissolving 0.63 g of $\mathrm{H}_{2} \mathrm{X} .2 \mathrm{H}_{2} \mathrm{O}$ to form $500 \mathrm{~cm}^{3}$ solution.

- Sodium hydroxide solution $\mathbf{P}$ made by dissolving 0.16 g of NaOH pellets to from $200 \mathrm{~cm}^{3}$.

## You are required to:

i) Determine the concentration of solution $\mathbf{P}$.
ii) Determine the relative molecular mass of $\mathbf{X}$ in the $\mathbf{H}_{2} \mathbf{X} .2 \mathbf{H}_{2} \mathbf{O}$

## Procedure

Fill the burette with solution $\mathbf{Q}$. Using a pipette, pipette $25 \mathrm{~cm}^{3}$ of solution $\mathbf{P}$ into $250 \mathrm{~cm}^{3}$ conical flask. Add 2-3 drops of phenolphthalein indicator and titrate with solution $\mathbf{Q}$. record your results in the table below. Repeat two more times to complete the table below.

|  | I | II | III |
| :--- | :---: | :---: | :---: |
| Final burette reading $\left(\mathrm{cm}^{3}\right)$ |  |  |  |
| Initial burette reading $\left(\mathrm{cm}^{3}\right)$ |  |  |  |
| Volume of Q used $\left(\mathrm{cm}^{3}\right)$ |  |  |  |

(4 mks)
a) Determine the average volume of a solution $\mathbf{Q}$ used.
(1mk)
b) Write a balanced chemical equation between $\mathbf{P}$ and $\mathbf{Q}$.
c) Calculate the concentration of Pin:
i) Moles per litre
(2mks)
ii) Grams per litre
(2mks)
d) Calculate the molarity of solution $\mathbf{Q}$.
(3 mks)
e) Calculate the formula mass of acid $\mathbf{H}_{2} \mathbf{X} \cdot 2 \mathrm{H}_{2} \mathrm{O}$
(2mks)
f) Hence calculate the relative molecular mass of $\mathbf{X}$
(2 mks)
