### **ACQUIRED HEART DISEASE.**

People who suffer from acquired heart diseases are usually born with normal hearts but contract the disease later on in life. Different heart diseases are brought about by various factors. For example, rheumatic heart disease is caused by a form of virus infection which may start with a sore throat. This is caused by rheumatic fever which affects many parts of the body such as the joints, skin, brain and the heart.

The most serious and long lasting effects are those of the heart, especially the heart valves, which becomes damaged. The valves may either become narrow preventing the free forward flow of blood or they may leak, throwing the circulation in disarray and inflaming all the three layers of the heart namely, ‘Pericardium’, ‘Myocardium’ and ‘Endocardium’. The blood valves usually get damaged causing the heart to be inefficient in pumping blood all over the body. This results in heart failure.

Some of the symptoms associated with this disease are swelling of the joints, pain and fever. In most cases, the symptoms disappear on their own but the toxins still remain in the blood and once they reach the heart, it becomes infected with the disease. The disease is referred to as the poor man’s disease because it normally occurs in overcrowded and unhygienic conditions. It also occurs where there is poor nutrition and inadequate health facilities. It may be cured through operation depending on the seriousness of the disease.

Another type of the acquired heart disease is the coronary heart disease. This disease causes the narrowing and roughening of the arteries which supply blood to the heart. Lack of enough

blood and oxygen causes the heart tissues to die thereby causing a heart attack which is fatal. Cholesterol deposits coat the inside lining of the arteries thereby causing them to narrow. This emanates from eating foods like red and fatty meat, eggs and sugar. This disease may on the other hand be hereditary. Doing physical activities helps to reduce the amount of cholesterol in the blood by burning up much of the fat thereby, leaving less coating on the arteries.

This disease can be treated either through the use of drugs or through vein *grafting* where the blocked part of the artery is by-passed. In severe cases, heart-transplant maybe required. In other cases, treatment maybe through either a closed or open heart surgery.

Although cholesterol in the blood is bad for the heart, only when very large quantities are taken is there an increase in blood cholesterol levels. Therefore, eating a few eggs a week or an occasional meal of meat would do no harm. You should think of the amount of fat that your food contains. A low-fat diet will provide you with the necessary calories that the body needs. Eating fatty foods will certainly contribute to your adding on weight which is unhealthy.

Hypertension is another type of acquired heart disease. The disease is normally associated with the socio-economic problems. Victims of hypertension are usually those people who are continually anxious, tense, depressed and worried. The higher the levels of table-salt taken, the higher the risk of getting hypertension. So, consumption of table-salt should be regulated to bare minimum. *Genetic factors* may also contribute to the *contraction* of hypertension. People from a particular family may seem to be more *prone* to the disease than those from another family. Treatment of the disease may be through drugs but *counselling* in some cases may also help.

**2. EXCERPT (25 MARKS)**

**Read the following excerpt and answer the questions that follow.**

**Nora:** Tell me what purpose you mean to put it to.

**Krogstad :** I shall only preserve it – to keep it in my possession . No one who is not concerned in the matter shall have the slightest hint of it. So that if the thought of it has driven you to any desperate resolution -

**Nora:** It has.

**Krogstad:** If you had it in your mind to run away from your home -

**Nora:** I had.

**Krogstad:** Or even something worse -

**Nora:** How could you know that?

**Krogstad:** Give up the idea.

**Nora:** How did you know I had thought of that?

**Krogstad:** Most of us think of that at first. I did , too- but I hadn't the courage.

**Nora:** (*faintly*)No more had I.

**Krogstad:** (*in a tone of relief*) No, that's it, isn't it -you hadn't the courage either?

**Nora:** No I haven't - I haven't.

**Krogstad:** Besides, it would have been a great piece of folly. Once the first storm at home is over -.

I have a letter for your husband in my pocket.

**Nora :** Telling him everything?

**Krogstad :** In as lenient a manner as I possibly could.

**Nora :** ( Quickly) He mustn't get the letter. Tear it up.

I will find some means of getting money.

**Krogstad:** Excuse me, Mrs. Helmer , but I think I told you just now -

**Nora:** I am not speaking of what I owe you. Tell me what sum you are asking my husband for, and I will get the money.

**Krogstad:** I am not asking your husband for a penny.

**Nora:** What do you want, then?

### 3. ORAL POEM

(20 MARKS)

Read the following oral poem and answer the questions that follow:

Don't cry baby

Sleep little baby

Father will nurse you

Sleep baby sleep

Little bird flitting away to the forest so fast

Tell me, little bird, have you seen her

Have you seen my crying baby's mother?

She went to the river at early dew

A pot upon her head

But down the water floats her pot

And the path from the river is empty

Shall I take him under the palm?

Where the green shade rests at noon?

Oh no, no

For the thorns will prick my baby

Shall I take him under the giant baobab

Where the silk cotton plays with the wing?

Oh no,no

For the termite – eaten bough will break  
And crush my little baby  
My little sleeping baby  
The day is long and the sun grows hot  
So, sleep my little baby ,sleep  
For mother is gone to a far,far land- Alas!  
She is gone beyond the river.
